# AUTOMATIC CYLINDER FOR HOT FOIL STAMPING ME90P

## TECHNICAL DATA

▶ Maxi sheet size	640 x 900 mm
▶ Mini sheet size	290 x 400 mm
▶ Maxi stamping size	620 x 800 mm
▶ Units of heating resistance	12
▶ Heating zones	3
▶ Advances	2 (standard)
▶ Capacity of band unwinding	610 mètres / 120 mm
▶ Maxi number of programmable steps	unlimited
▶ <b>Adjusting bed pressure</b>	Slot in regulation 0,5 mm
▶ Maxi reel width	800 mm
▶ Stamping speed	800 à 3000 sheets / hour
▶ Stamping speed average	2000sheets / hour
▶ Height of stamping plate	7 mm
▶ Maxi heating temperature	220 °C
▶ Heating regulation – Maxi difference	± 2°C
▶ Power needed (3-phases)	motor : 10,8 kW / heating and advances : 17 kW
▶ Tension 3 x 400 V	50 HZ
▶ Machine's dimensions	L 4350 / W 2400 / H 1650 mm
▶ Total weight	6800 Kg

Automatic hot foil stamping press for high quality solids as well fine detailed stamping.

Functional design for quick job changes over:

- Adjustable bed's height for easy pressure regulation without packing modification
- Acoustic signal and automatic stop at foil's reel's end.
- Temporized inching speed
- Industrial computer with 15" touch screen monitor, user friendly software, numerical keyboard, easy programming of all possible combinations of the works, parameters storage on each production order.

Geometry of the machine entirely rebuilt (new sliders) provides reliability and high precision.

Centralized lubrication system including lubricating of sliders for a greater longevity...
